SOME GREAT REASONS TO CHOOSE US:

- We're one of the very few supervisory ground handling agents that can provide solutions to solve Shanghai's complex parking restrictions.
- Our team is trained to the highest ground support standards, with over three decades of supporting missions across China – including business, charter, and cargo.
- We have extensive experience handling wide-body aircraft for both charter and cargo operations, and we can help coordinate complex on- and off-airport logistics for cargo flights.
